Proteins

Identification of the sites in collagen α-chains that bind serum anti-gelatin factor (cold-insoluble globulin).
By W. Dessau, B. C. Adelmann, R. Timpl & G. R. Martin 55

Synthesis of the native copper(II)-transport site of human serum albumin and its copper(II)-binding properties.
By K. S. Iyer, S.-J. Lau, S. H. Laurie & B. Sarkar 61

Vitamin A receptors. Retinoic acid binding in ocular tissues.
By B. Wiggert, D. R. Bergsma, R. Helmsen & G. J. Chader 87

The fractionation of histones isolated from *Euglena gracilis*.
By N. J. Jardine & J. L. Leaver 103

Actin in young and senescent fibroblasts.
By P. J. Anderson 169

The binding of 2,4,6-trinitrophenyl derivatives to the mouse myeloma immunoglobulin A protein MOPC 315.
By S. K. Dower, P. Gettins, R. Jackson, R. A. Dwek & D. Givol 179

The components of troponin from chicken fast skeletal muscle. A comparison of troponin T and troponin I from breast and leg muscle.
By J. M. Wilkinson 229

Nucleic Acids

Biosynthesis of a hypermodified nucleotide in *Saccharomyces carlsbergensis* 17S and HeLa-cell 18S ribosomal ribonucleic acid.
By R. C. Brand, J. Klootwijk, R. J. Planta & B. E. H. Maden 71

Localization of the ribonucleotide sites in rat liver mitochondrial deoxyribonucleic acid.
By D. M. Lonsdale & I. G. Jones 79

PAGE

Carbohydrates

Isolation of proteoglycans from human articular cartilage.
By M. T. Bayliss & S. Y. Ali 123

Articular-cartilage proteoglycans in aging and osteoarthritis.
By S. Inerot, D. Heinegård, L. Audell & S.-E. Olsson 143

Enzymology

Use of flux ratio measurements for the determination of the order of addition of substrates and products in enzyme reactions.
By H. G. Britton & L. G. Dann 29

Kinetics and mechanism of action of muscle pyruvate kinase.
By L. G. Dann & H. G. Britton 39

NAD(P)H dehydrogenase and its role in the vitamin K (2-methyl-3-phytyl-1,4-naphthaquinone)-dependent carboxylation reaction.
By R. Wallin, O. Gebhardt & H. Prydz 95

Characteristics of hepatic alanine–glyoxylate aminotransferase in different mammalian species.
By T. Noguchi, E. Okuno, Y. Takada, Y. Minatogawa, K. Okai & R. Kido 113

Stabilization and solubilization of bovine corpus-luteum adenylate cyclase. The effects of guanosine triphosphate, guanosine 5′-[β,γ-imido]triphosphate, sodium fluoride and Tris/hydrochloric acid concentration on enzyme activity.
By J. L. Young & D. A. Stansfield 133

The interaction of α-*N*-(*p*-toluenesulphonyl)-*p*-guanidino-L-phenylalanine methyl ester with thrombin and trypsin.
By Y. S. Klausner, M. Rigbi, T. Ticho, P. J. de Jong, E. J. Neginsky & Y. Rinott 157

PAGE

Structural requirements in the reaction of morphine uridine diphosphate glucuronyltransferase with opioid substances.
By E. Sanchez, E. del Villar & T. R. Tephly 173

Further characterization of collagen galactosyltransferase from chick embryos.
By L. Risteli 189

Reversible inhibitors of penicillinases.
By P. A. Kiener & S. G. Waley 197

A radiochemical method for the measurement of coproporphyrinogen oxidase and the utilization of substrates other than coproporphyrinogen III by the enzyme from rat liver.
By G. H. Elder & J. O. Evans 205

PAGE

Factors determining the sequence of oxidative decarboxylation of the 2- and 4-propionate substituents of coproporphyrinogen III by coproporphyrinogen oxidase in rat liver.
By G. H. Elder, J. O. Evans, J. R. Jackson & A. H. Jackson 215

A reappraisal of the reaction pathway of pyruvate carboxylase.
By S. B. Easterbrook-Smith, J. C. Wallace & D. B. Keech 225

An arsenical analogue of adenosine diphosphate.
By D. Webster, M. J. Sparkes & H. B. F. Dixon 239

RAPID PAPERS

PAGE

Proteins

Anomalous migration of leghaemoglobin on sodium dodecyl sulphate/polyacrylamide-gel electrophoresis.
By P. Lehtovaara 251

PAGE

Nucleic Acids

Recognition of individual *Escherichia coli* transfer ribonucleic acids by 1-adenine-specific methyltransferase from rat liver.
By J. Kraus 247

Enzymology

Activation of immobilized acetyl-coenzyme A carboxylase.
By A. D. Landman & J. Lampert 255

Contents of Volume 169, No. 2

FULL PAPERS

PAGE

Proteins

Properties of cytochrome *c* modified by attachment to a carbohydrate polymer.
By M. C. Silvestrini, A. Colosimo, M. Brunori & E. Antonini 257

Interaction of the myelin basic protein with the anionic detergent sodium dodecyl sulphate.
By A. J. S. Jones & M. G. Rumsby 281

Isolation, composition and ordering of cyanogen bromide peptides in human casein.
By M. L. Groves & R. Greenberg 337

PAGE

Preferential nitration with tetranitromethane of a specific tyrosine residue in penicillinase from *Staphylococcus aureus* PC1. Evidence that the preferentially nitrated residue is not part of the active site but that loss of activity is due to intermolecular cross-linking.
By A. F. Bristow & R. Virden 381

An equilibrium study of metal ion binding to human plasma coagulation Factor XIII.
By B. A. Lewis, J.-M. Freyssinet & J. J. Holbrook 397

GENERAL BOOKBINDING CO.
139AA 013 C
78 2 1
QUALITY CONTROL MARK
2234

PAGE

Protein–protein interaction in blood clotting. The use of polarization of fluorescence to measure the dissociation of plasma Factor XIIIa.
By J.-M. Freyssinet, B. A. Lewis, J. J. Holbrook & J. D. Shore 403

Molecular weights of the Thy-1 glycoproteins from rat thymus and brain in the presence and absence of deoxycholate.
By P. W. Kuchel, D. G. Campbell, A. N. Barclay & A. F. Williams 411

Enzymology

Purification, characterization and inhibition of human skin collagenase.
By D. E. Woolley, R. W. Glanville, D. R. Roberts & J. M. Evanson 265

The binding of copper ions to copper-free bovine superoxide dismutase. Kinetic aspects.
By A. Rigo, P. Viglino, M. Bonori, D. Cocco, L. Calabrese & G. Rotilio 277

Characterization of two acid proteinases found in rabbit skin homografts.
By B. Jasani, M. K. Jasani & M. D. Talbot 287

Uridine diphosphate glucose–sterol glucosyltransferase and nucleoside diphosphatase activities in etiolated pea seedlings.
By M. J. Staver, K. Glick & D. J. Baisted 297

Partial purification and characterization of a pyruvate dehydrogenase-complex-inactivating enzyme from rat liver.
By A. Lynen, E. Sedlaczek & O. H. Wieland 321

Protein–lipid interaction in cytochrome oxidase from *Saccharomyces cerevisiae*. Effects of detergents and reconstitution of enzyme activity by phospholipids by using cholate-mediated exchange.
By M. Virji & P. F. Knowles 343

PAGE

Purification and properties of a nuclear protein kinase associated with ribonucleic acid polymerase I.
By J. Hirsch & O. J. Martelo 355

Participation of the iron–sulphur cluster of the covalently bound coenzyme of trimethylamine dehydrogenase in catalysis.
By D. J. Steenkamp, T. P. Singer & H. Beinert 361

Thermal denaturation of *Micrococcus lysodeikticus* adenosine triphosphatase. Influence of temperature on the circular dichroism, fluorescence and enzymic activity of the protein.
By J. A. Ayala & M. Nieto 371

Substrate specificity and mode of action of a cellulase from *Aspergillus niger*.
By P. L. Hurst, P. A. Sullivan & M. G. Shepherd 389

Intermolecular Organization

A simple and rapid method for the reversible removal of lipids from a membrane-bound enzyme.
By S. L. Goodman, M. Isern de Caldentey & K. P. Wheeler 305

Ouabain binding to phospholipid-dependent adenosine triphosphatase.
By S. L. Goodman & K. P. Wheeler 313

The linkage of sugar phosphate polymer to peptidoglycan in walls of *Micrococcus* sp. 2102.
By J. Heptinstall, J. Coley, P. J. Ward, A. R. Archibald & J. Baddiley 329

RAPID PAPERS

Proteins

The subunit structure of the *arom* multienzyme complex of *Neurospora crassa*. Evidence from peptide 'maps' for the identity of the subunits.
By J. Lumsden & J. R. Coggins 441

Physical measurements of the liver glucocorticoid receptor.
By G. Litwack, M. H. Cake, R. Filler & K. Taylor 445

Nucleic Acids

Kinetics and template-dependency of ribonucleic acid synthesis by bacterial ribonucleic acid polymerase.
By N. Panayotatos & F. J. Kézdy 421

Enzymology

Demonstration of chymosin (EC 3.4.23.4) in the stomach of newborn pig.
By B. Foltmann, P. Lønblad & N. H. Axelsen 425

PAGE

The pyridoxal-binding site in pyridoxamine–pyruvate transaminase.
By J. Hodsdon, H. Kolb, E. E. Snell & R. D. Cole 429

Phosphorylation of additional sites on pyruvate dehydrogenase inhibits its re-activation by pyruvate dehydrogenase phosphate phosphatase.
By P. H. Sugden, N. J. Hutson, A. L. Kerbey & P. J. Randle 433

PAGE

Intermolecular Organization

A theoretical analysis of the use of zonal gel filtration in the detection and purification of protein–ligand complexes.
By I. A. Nimmo & A. Bauermeister 437

Contents of Volume 169, No. 3

FULL PAPERS

PAGE

Proteins

Oestrogen receptor of mammary gland. Inhibition of aggregation and characterization of receptor from lactating gland in the presence of sodium bromide.
By F. Auricchio, A. Rotondi, E. Schiavone & F. Bresciani 481

The functional unit of calcium-plus-magnesium-ion-dependent adenosine triphosphatase from sarcoplasmic reticulum. The aggregational state of the deoxycholate-solubilized protein in an enzymically active form.
By K. E. Jørgensen, K. E. Lind, H. Røigaard-Petersen & J. V. Møller 489

Characterization of colchicine-binding activity in *Dictyostelium discoideum*.
By P. Cappuccinelli & B. D. Hames 499

The binding of porphyrins by ligandin.
By E. Tipping, B. Ketterer & P. Koskelo 509

Gliding edge dislocations in proteins as a mechanism for active ion transport.
By H. D. Chandler, C. J. Woolf & H. R. Hepburn 559

Proteolytic and peroxidatic reactions of commercial horseradish peroxidase with myelin basic protein.
By W. Cammer, L. Z. Bieler & W. T. Norton 567

Isolation and partial characterization of rabbit plasma α_1-antitrypsin.
By A. Koj, M. W. C. Hatton, K.-L. Wong & E. Regoeczi 589

The oxygen-linked zinc-binding site of human haemoglobin.
By J. G. Gilman & G. J. Brewer 625

PAGE

Purification of rat fibrinogen and its constituent chains.
By I. A. M. van Ruijven-Vermeer & W. Nieuwenhuizen 653

Preparation of internally labelled rat pituitary somatotropin (growth hormone).
By M. Wallis, R. V. Davies & M. Daniels 669

Comparison of guinea-pig serum lipoproteins after iodination by two different methods.
By P. K. Weech, F. McTaggart & G. L. Mills 687

Nucleic Acids

Extensive homologies between the methylated nucleotide sequences in several vertebrate ribosomal ribonucleic acids.
By M. S. N. Khan, M. Salim & B. E. H. Maden 531

Lipids

The presence of dolichol in a lipid diphosphate *N*-acetylglucosamine from *Saccharomyces cerevisiae* (baker's yeast).
By F. Reuvers, P. Boer & F. W. Hemming 505

Carbohydrates

Characterization of the keratan sulphate proteoglycans from bovine corneal stroma.
By I. Axelsson & D. Heinegård 517

Enzymology

Chemical and enzymic studies on the characterization of intermediates during the removal of the 14α-methyl group in cholesterol biosynthesis. The use of 32-functionalized lanostane derivatives.
By M. Akhtar, K. Alexander, R. B. Boar, J. F. McGhie & D. H. R. Barton 449

PAGE

Glutathione *S*-transferase in human lymphoid cell lines and fractionated peripheral leucocytes.
By N. Kaplowitz, C. Spina, M. Graham & J. Kuhlenkamp 465

Magnetic coupling of the molybdenum and iron–sulphur centres in xanthine oxidase and xanthine dehydrogenases.
By D. J. Lowe & R. C. Bray 471

Pyruvate carboxylase from a thermophilic *Bacillus*. Studies on the specificity of activation by acyl derivatives of coenzyme A and on the properties of catalysis in the absence of activator.
By S. M. Libor, T. K. Sundaram & M. C. Scrutton 543

Malate dehydrogenase of the cytosol. Preparation and reduced nicotinamide–adenine dinucleotide-binding studies.
By A. Lodola, S. P. Spragg & J. J. Holbrook 577

Partial purification and properties of an acid nucleotidase from the postmicrosomal supernatant of rat spleen.
By H. Tjernshaugen 597

The preparation and purification of individual human pepsins by using diethylaminoethylcellulose.
By N. B. Roberts & W. H. Taylor 607

PAGE

The isolation and properties of a non-pepsin proteinase from human gastric mucosa.
By N. B. Roberts & W. H. Taylor 617

Purification and characterization of the class-II D-fructose 1,6-bisphosphate aldolase from *Escherichia coli* (Crookes' strain).
By S. A. Baldwin, R. N. Perham & D. Stribling 633

Novel kinetic and structural properties of the class-I D-fructose 1,6-bisphosphate aldolase from *Escherichia coli* (Crookes' strain).
By S. A. Baldwin & R. N. Perham 643

Purification and properties of the S1 secondary alkylsulphohydrolase of the detergent-degrading micro-organism, *Pseudomonas* C12B.
By B. Bartholomew, K. S. Dodgson & S. D. Gorham 659

The dye-linked alcohol dehydrogenase of *Rhodopseudomonas acidophila*. Comparison with dye-linked methanol dehydrogenases.
By C. W. Bamforth & J. R. Quayle 677

General Methods

Demineralization in organic solvents by alkylammonium salts of ethylenediaminetetra-acetic acid.
By J. E. Scott & T. W. Kyffin 697

RAPID PAPERS

PAGE

Proteins

Isolation and separation of α- and β-tubulin from chick-embryo brain, muscle and skin.
By A.-R. A. El-Hamalawi 717

Small Molecules

The stereochemistry of β-lactam formation in cephalosporin biosynthesis.
By J. A. Huddleston, E. P. Abraham, D. W. Young, D. J. Morecombe & P. K. Sen 705

PAGE

Enzymology

Rapid and convenient method for the assay of aminopropyltransferases.
By H. Hibasami & A. E. Pegg 709

Affinity chromatography of the cellulase system of *Trichoderma koningii*.
By G. Halliwell & M. Griffin 713

Proteinase inhibitors of bovine nasal cartilage.
By P. J. Roughley, G. Murphy & A. J. Barrett 721
